Hello

I feel that I have to make an objection to the plans detailed under PLAN/2/20/0568. The density of building is far closer than necessary or attractive for an already developed area. 41 storeys will be visible from all parts of the borough and the designs do not appear especially adventurous or attractive. Furthermore, not only is there little of much needed affordable housing, but no forward thinking appears to have taken place as to where the small families housed in the apartments will go once they have larger families. A much greater mix of accommodation would be more desirable. Other objectors will have made most of the points I have raised and more. As a resident of 53 years in Woking I have seen it grow from a rather rundown town to what had seemed a reasonable balance of mixed business, shopping and accommodation. These proposals take the process a step too far and I wish to object to them.

Richard Christophers
