I am writing to comment on the proposed plans for the York Road project in the new development of Woking town centre. I am supporting all the proposed plans as I believe the community needs the resource, particularly in the areas of outreach and groups to tackle substance abuse.

Having space to make the homeless safe is a vitally important thing for a town to show it cares for its inhabitants and I believe the proposed ideas will help to tackle the root causes of homelessness as well as providing a vital emergency service where it is needed.

Please count my comments as in favour of all the proposed plans.
